Divyansh Kumar Srivastava

B.Tech – Computer Science Engineering Student

Gorakhpur, India — +91 6394013906 — divyanshgkp36@gmail.com

LinkedIn — GitHub — LeetCode

Profile

Computer Science undergraduate with a 9.11 CGPA and a strong foundation in Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, and software development. Experienced in developing full-stack applications and applying problem-solving skills to real-world challenges. Seeking to leverage technical expertise and continuous learning to build efficient, scalable, and maintainable software solutions.

Education

VIT University, Bhopal Campus — Expected May 2027
Bachelor of Technology in Computer Science Engineering — CGPA: 9.11/10

G.N. National Public School, Gorakhpur — 2023
Higher Secondary School — Percentage: 82.6%

G.N. National Public School, Gorakhpur — 2021
Secondary School — Percentage: 83.83%

Technical Skills

- **Programming:** C++, Java
- **Backend:** Node.js, Express.js, Strapi, REST APIs.
- **Web:** React.js, HTML, CSS.
- **Core CS:** Data Structures & Algorithms, OOP, DBMS, Operating Systems, Problem Solving.
- **Databases:** MySQL, MongoDB, SQLite.
- **Cloud & Tools:** AWS (EC2, S3, IAM), Git, GitHub.

Projects

CodePrep.AI [Live Demo] | [GitHub] *React.js, Node.js, Express.js, MongoDB, Firebase, OpenRouter, PDF.js, Redux Toolkit*

- Built and deployed a full-stack AI interview platform that analyzes candidate resumes and generates personalized mock interviews based on role, experience, skills, projects, and interview mode.
- Engineered a resume-processing pipeline using Multer and PDF.js to extract PDF content, then integrated an LLM through OpenRouter to convert unstructured resumes into structured candidate profiles.
- Implemented AI-driven question generation with constrained prompting, progressive difficulty, and post-processing, while introducing a credit-based usage system to control expensive LLM operations.
- Developed authenticated REST APIs with Express.js and Firebase Google Authentication, persisting interview sessions and performance data in MongoDB and providing analytics and downloadable PDF reports.

Fitness Tracker *React, Strapi, SQLite, Gemini API*

- Developed a full-stack fitness tracking application using React, TypeScript, Strapi, and REST APIs, enabling users to manage food and physical activity records through an interactive dashboard.
- Implemented JWT-based authentication and user-level authorization, associating food and activity records with authenticated users to ensure secure, user-specific data access.
- Integrated Google Gemini's multimodal API for image-based food analysis, processing uploaded food images and returning structured information such as food name and estimated calorie values.

Certifications

- **NPTEL – IIT Kharagpur:** Marketing Analytics (91%) – Gold Medal.
- **Coursera:** The Bits and Bytes of Computer Networking.

Achievements

- Maintained a strong academic record with a **9.11/10 CGPA** in B.Tech Computer Science Engineering.
- Earned **12+ S Grades** across core academic courses, reflecting consistent academic excellence, strong work ethic, and dedication to achieving high standards.
- Regularly practice Data Structures & Algorithms and problem solving on LeetCode and GeeksforGeeks.

Technical Highlights

- Built and deployed full-stack applications with **React.js, Node.js, Express.js, REST APIs, and MongoDB**.
- Implemented authentication, authorization, API integration, database operations, and AI-powered features across projects.
- Hands-on experience with **AWS services**, Git/GitHub, SQL, and backend development.

Interests

Data Structures & Algorithms, Backend Development, Software Engineering, Cloud Computing.
